## GMO

### **Chocolate:**

Cargill Cacao et Chocolat certifies that for all the chocolates manufactured within our group the ingredients used are of non-GMO origin.

The soya lecithin used as emulsifier in our chocolate recipes comes from several "Identity Preserved" sources. Deliveries of soya lecithin are only approved to unload if accompanied with relevant traceability paperwork as well as PCR certificates.

**According to the European Legislation CE 1829/2003 and CE 1830/2003, our chocolates does not require any labelling as regard to GMO.**

## RADIATION AND GAS TREATMENT

### **Chocolate:**

Cargill Cocoa and Chocolate certifies that all goods manufactured within our group as well as the chocolates ingredients are not submitted to any kind of radiation or gas treatment.

## AFLATOXINS

### **Chocolate:**

Cargill Cocoa and Chocolate certifies that our goods manufactured within our group have levels of residues of aflatoxin below the limit as proposed by the European commission.

Aflatoxin B1 : 2ppb max.

Total Aflatoxins (B1, B2, G1, G2) : 4ppb max.

## PESTICIDES & HEAVY METALS

### **Chocolate :**

Cargill Cocoa and Chocolate certifies that our goods are manufactured in accordance with the existing Belgium, Germany, Suisse, and European legislation and Codex alimentarius recommendations.

Sincerely,  
Cargill Cocoa & Chocolate  
February 2014
